

Envirotech EVA - Training schedule

Interloc Building Solutions want to work with there existing and new contractors and give them flexible options when it comes to training.

Each of the options below will ensure that contractor's new to single ply will feel comfortable with the product and its installation.

Option 1 - Training held at our office in Rosyth, Fife, Scotland

The training starts at 9am with a 1 hour presentation and finishes at approximately 4pm or later if required. In addition if the contractor requests further training Interloc can work on site for the first job.

The training consists of the following:-

Presentation covering

Theory

Introduction to Envirotech EVA and the benefits.

Technical manual overview.

Web site

Pricing

Practical hands on

Working on a deck installing a newly insulated roof and a direct overlay onto an existing felt roof.

Envirotech EVA fleece backed single ply fixing down techniques

Clad metal detailing

Hot air welding, laps, seam strap

Hand welding techniques including installation of upstands, internal and external corners and raggle and termination details,

Cost for training option 1 - £150.00 per person

Option 2 - Training held at Rosyth, Fife, Scotland

This is a fully comprehensive training session held over one and a half days. It gives the contractor and /or his operatives a thorough knowledge on all the different single ply installation options as well as extended time to work with the hot air welders doing more detail work and gaining more confidence and experience with the product.
